DETAILED ACTION

This Office action is in response to the amendment filed February 6, 2003 in which claim 66 was canceled and claim 65 was amended.

The rejection of claim 65 under 35 USC 112, first paragraph is withdrawn in view of the amendment to the claim.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 31-40, 42-65, 67-79, 81-104 and 106-108 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,525,005. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the application and the patent are directed to a antimicrobial phosphate ester conveyor lubricant containing alkoxylated phosphate esters, quaternary ammonium antimicrobial agents and water. The claims other of the application are encompassed by those of the

Art Unit: 1714

patent and differ only in that the base claims do not contain an extreme pressure additive.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claims 31-36, 38-40, 42, 45-60, 63-65, 67, 70-75, 77-79, 81, 84-99, 102-104 and 106 are rejected under 35 U.S.C. 103(a) as being unpatentable over Person-Hei (US 5,723,418) in view of Liu (5,244,589) for the reasons of record.

Applicant's arguments have been considered but are not deemed to be persuasive.

Applicant argues that the use of a linear quaternary ammonium ion in a conveyor lubricant provides unexpected results. Applicant has submitted a Declaration to support the alleged unexpected results illustrated in Fig. 2 and to present a broader range of proportions of the claimed components.

The declaration submitted by Dr. Kravitz has been considered but is not deemed sufficient to overcome the prior art of record.

The showings are not commensurate in scope with the claims. The claims are devoid of proportions. Clearly, the amount of the quaternary ammonium compound used in the composition affects the Coefficient of Friction, as shown in Examples 3 and 4. Also, all of the examples contain a chelating agent, whereas there is no recitation of a chelating agent in the independent claims.
